

1st International Conference on ICT Solutions for Justice (ICT4Justice '08)

24th OCTOBER 2008
Rodoula Kehaghia Auditorium
STEIN Bulding
2 Kalapothaki Str., Thessaloniki
Greece

Goal:

Increase and reshaping of criminal phenomena in the last years pose new challenges to national criminal justice systems: international terrorism, illegal immigration, rise in violent crimes, and the “globalisation” of organized crime are significant examples. ICT deployment in European judicial systems is a key element to face these challenges and to improve significantly the administration of criminal justice.

The ICT4JUSTICE event aims to give a European-wide view of the present and future synergies between criminal justice and ICT technologies, by bringing together experiences, best practices and perspective activities of judicial and technological actors

Sponsored by J-WeB

Supported by JUMAS

Projects co-funded by the European Commission FP6 & FP7

Organizing institutions:
